

JOSHUA IBITOYE

Systems & Cloud Support Administrator | Tier 2 Technical Support | Identity & Network Support

St. Louis, MO | jsibitoye@gmail.com | [linkedin.com/in/jsibitoye](https://www.linkedin.com/in/jsibitoye) | github.com/jsibitoye | www.jsibitoye.com

PROFESSIONAL SUMMARY

Systems, cloud support, and Tier 2 IT operations professional with 5+ years supporting enterprise technology environments across endpoints, networks, Microsoft-centered support workflows, cloud-connected services, secure backend platforms, and operational troubleshooting. Completed 856 field service, infrastructure, and network support assignments for 162 clients across retail, office, telecom, financial, and distributed business environments. Strong fit for roles requiring Microsoft 365 support, Active Directory and Azure/Entra ID fundamentals, Windows Server and Linux administration, DNS/DHCP/VLAN troubleshooting, VPN/firewall support, endpoint and device support, access management, audit logging, documentation, ticket closure, and SLA-driven service restoration. Backed by graduate training in Cybersecurity and Information Security, AWS certifications, CompTIA Security+, and hands-on experience supporting technical issues from physical infrastructure through endpoint, network, cloud, and security layers.

CORE TECHNICAL VALUE

- Tier 2 escalation support across endpoint, network, Microsoft 365, cloud-connected, and security-sensitive environments.
- Systems administration foundation across Windows endpoints, Windows Server, Linux, Active Directory fundamentals, access support, secure configuration, and technical documentation.
- Cloud and identity support exposure across Azure/Entra ID fundamentals, AWS, authentication controls, audit logging, monitoring, and access management.
- Strong network troubleshooting across TCP/IP, DNS, DHCP, VLANs, LAN/WAN, VPNs, firewalls, Wi-Fi, VoIP/SIP, and connectivity restoration.
- High-volume support execution with 856 completed field service, network, infrastructure, and technical support assignments for 162 clients.

TECHNICAL STRENGTHS

Microsoft & Identity

Microsoft 365 support, Active Directory fundamentals, Azure/Entra ID fundamentals, user access support, onboarding/offboarding support, MFA/authentication concepts, permissions troubleshooting, access review support, audit logging.

Networking

TCP/IP, DNS, DHCP, VLANs, LAN/WAN, routing/switching basics, VPNs, firewalls, Wi-Fi, access points, VoIP/SIP phones, demarc extensions, network diagnostics, connectivity restoration.

Support Operations

Tier 2 support, remote support, incident troubleshooting, service restoration, ticket documentation, SLA updates, post-install validation, asset records, knowledge base notes, SOP documentation.

Systems Administration

Windows endpoints, Windows Server exposure, Linux administration, patching support, endpoint readiness, printers, POS systems, kiosks, server/storage hardware, device swaps, hardware/software troubleshooting.

Cloud & Security

AWS, Azure essentials, Docker, Kubernetes, monitoring/logging tools, secure configuration, incident triage, evidence capture, SOC/audit-readiness fundamentals, regulated-environment support.

Programming & Integration

Python, Go, Java Spring Boot, PHP, REST APIs, authentication controls, secure data handling, automation and log-analysis utilities, cloud-connected application troubleshooting.

SELECTED CORE ACCOMPLISHMENTS

- Completed 856 field service, networking, infrastructure, and technical support assignments for 162 clients across retail, office, telecom, financial, and distributed business environments.
- Supported network-connected business systems including routers, switches, wireless networks, VoIP/SIP phones, POS systems, printers, Windows endpoints, server/network hardware, and CCTV/IP camera environments.

- Resolved incidents through structured troubleshooting across power, cabling, network connectivity, endpoint configuration, hardware replacement, software behavior, authentication controls, logging, and escalation paths.
- Combined infrastructure support with cybersecurity and cloud knowledge, including access management, audit logging, secure configuration, monitoring, endpoint readiness, and cloud-connected reliability support.

PROFESSIONAL EXPERIENCE

Lead Engineer / IT Support & Field Network Specialist | *ITechSVC LLC via Field Nation* | *Missouri / Remote & On-Site* | **Jan 2024 - Present**

- Delivered remote and on-site technical support across retail, office, telecom, and distributed business environments, handling device installs, issue resolution, post-install validation, and SLA-based troubleshooting.
- Installed, configured, and troubleshot routers, switches, wireless networks, VoIP/SIP phones, POS systems, printers, Windows endpoints, and server/network hardware under client SLAs.
- Performed structured cabling, low-voltage runs, patching, termination, testing, labeling, demarc extensions, and infrastructure diagnostics for production sites.
- Supported networking, wireless, server/storage, point-of-sale, CCTV/IP camera, kiosk, and printer-related work orders, including equipment swaps, connectivity issues, and service restoration.
- Coordinated with client stakeholders, dispatch teams, and remote support teams to document findings, communicate status, close tickets, and keep assignments on schedule.
- Applied a consistent troubleshooting process across physical infrastructure, endpoint configuration, network connectivity, application behavior, user access issues, logging, and escalation paths to reduce repeat issues.

Technical Systems Support Specialist (Part-Time) | *Inteck Innovations* | *Remote, United States* | **Feb 2025 - Present**

- Support cloud-connected technical workflows, data validation processes, and production-oriented troubleshooting for software environments requiring accuracy, documentation, and quality control.
- Assist with deployment and reliability support for workloads using AWS, Kubernetes, Python-based tooling, and structured operational review processes.
- Strengthen analytical troubleshooting, issue isolation, documentation, and cross-functional communication in a remote technical environment.
- Help validate system behavior, review operational outputs, and document exceptions for follow-up by engineering or support teams.

DevOps & API Engineer | *Inteck Innovations* | *United States / Hybrid* | **Jul 2024 - Feb 2025**

- Designed and supported secure backend systems and RESTful APIs for security-sensitive applications using Go and Java Spring Boot.
- Implemented authentication controls, access management, encryption, audit logging, monitoring, and Docker/AWS-based deployment support for payment, wallet, and fraud-detection systems.
- Troubleshot authorization, integration, logging, and reliability issues across cloud-connected environments and collaborated with technical teams to improve operational stability.
- Supported monitoring and logging practices that improved visibility into application behavior, integration failures, access-related errors, and production reliability concerns.
- Worked across application, cloud, and security boundaries, strengthening fit for environments where systems administration, identity support, and troubleshooting overlap.

Cybersecurity Research Assistant / Graduate Assistant | *Southeast Missouri State University* | *Cape Girardeau, MO* | **Sep 2022 - May 2024**

- Maintained laboratory environments using Linux, Windows Server, and Raspberry Pi clusters, supporting secure system operations, patching, environment readiness, and technical documentation.
- Assisted with digital forensics exercises, network security evaluations, anomaly-detection testing, and infrastructure troubleshooting in controlled lab environments.
- Documented repeatable technical procedures and supported system validation activities requiring accuracy, evidence capture, and clear communication.

- Supported secure configuration, monitoring, and operational readiness activities across lab systems used for cybersecurity and infrastructure research.

Network Systems Integration Engineer | *RGS Worldwide Limited* | *Nigeria* | **Jul 2020 - Aug 2022**

- Supported telecom systems integration projects in large-scale network operations environments delivered through Huawei platform deployments.
- Assisted in rollout validation, operational checks, automation, log-analysis utilities, and centralized monitoring dashboards used by network operations teams.
- Coordinated technical tasks with multi-vendor teams where disciplined troubleshooting, documentation, monitoring, and issue escalation were critical.
- Contributed to operational visibility by supporting telemetry, diagnostics, and fault-detection workflows in high-availability network environments.

Software Engineer (Backend Systems) | *MacroWare Ltd* | *Nigeria* | **Jan 2019 - Feb 2020**

- Designed and maintained backend services and secure APIs for enterprise applications using Java, PHP, and Python.
- Implemented authentication, validation, encryption, and secure data-handling practices while supporting application reliability and troubleshooting.
- Collaborated with internal teams to diagnose backend application issues, support integration workflows, and maintain stable service behavior.

Network Engineering Intern | *NNPC Limited (PPMC)* | *Nigeria* | **Jan 2016 - Mar 2017**

- Assisted in deployment and support of enterprise LAN/WAN infrastructure, VPN configuration, firewall policies, and technical documentation.
- Participated in infrastructure troubleshooting, connectivity checks, and basic network security control support.

ADDITIONAL EXPERIENCE

- Academic Coordinator (Part-Time), Atlantic International University, Remote (2018 - 2022): Managed sensitive academic and administrative records and supported structured data validation, reporting, and documentation workflows.
- Medical Research Transcriber (Contract), University of Ibadan & Partner NGOs (2018 - 2019): Supported research teams with accurate transcription, data preparation, and data validation for research documentation.

EDUCATION & CERTIFICATIONS

Education	Certifications
M.Sc., Cybersecurity - Southeast Missouri State University, USA (2022 - 2024)	Microsoft SC-300 Identity and Access Administrator Associate
M.Sc., Information Security - University of Ibadan, Nigeria (2020 - 2022)	AWS Certified DevOps Engineer - Professional
B.Tech., Computer Engineering - LAUTECH, Nigeria (Top 10% of class) (2012 - 2018)	AWS Certified Solutions Architect - Associate
	CompTIA Security+
	Certified Cybersecurity Technician - EC-Council
	Digital Forensics Training - EC-Council
	HIPAA Awareness for Business Associates

TECHNICAL SKILLS

Systems & Administration: Windows endpoints, Windows Server exposure, Linux administration, Microsoft 365 support, Active Directory fundamentals, Azure/Entra ID fundamentals, endpoint setup, patching support, backup and environment-readiness concepts.

Identity & Access Support: User access support, access permissions, onboarding/offboarding support, MFA/authentication concepts, authorization controls, audit logging, access review support, secure configuration.

Networking: TCP/IP, DNS, DHCP, VLANs, LAN/WAN, routing/switching basics, VPNs, firewalls, Wi-Fi, access points, VoIP/SIP phones, demarc extensions, network diagnostics.

Endpoint & Device Support: Windows endpoints, printers, POS systems, kiosks, server/storage hardware, device swaps, hardware installation, peripherals, imaging/deployment support concepts, asset records.

Cloud & DevOps Support: AWS, Azure essentials, Docker, Kubernetes, GitHub, REST APIs, Java Spring Boot, Go, Python, monitoring/logging tools, cloud-connected deployment support.

Security & Compliance Support: Access management, audit logging, incident triage, endpoint security fundamentals, secure configuration, evidence capture, SOC/audit-readiness fundamentals, regulated-environment support.

ITSM & Documentation: Tier 2 support, remote support, incident troubleshooting, service restoration, ticket documentation, SLA updates, post-install validation, knowledge base notes, SOP documentation.

Infrastructure & Site Technology: Structured cabling, low-voltage support, patching, termination, testing, labeling, cable management, site readiness, CCTV/IP cameras, rack/connectivity support.

SELECTED TECHNICAL PROJECTS

- **Cloud Infrastructure Optimization:** Deployed and supported resilient AWS architectures using EC2, Lambda, DynamoDB, and monitoring tools to improve scalability, reliability, and fault tolerance.
- **Credit Card Fraud Detection System:** Developed a transaction-pattern analysis system to identify anomalous and high-risk activity, reinforcing security-sensitive data handling and operational validation skills.
- **Network Fault Detection Concept:** Designed a telemetry-driven network fault detection and recovery concept focused on root-cause analysis, alerting, and resilience in distributed network environments.
